Predator or Prey?

Autumn 1 Can You…? Home Learning Challenges

Here is this half term's homework grid. Please encourage your child/ren to have a go at these weekly activities and share their work on Google Classroom or bring it into school to share with the teacher and class.

Weekly Activities

Reading – Read your reading book or library book at least 3 times a week.
Learn spellings – spellings list for weekly test (on Google Classroom).
Times tables – Practise ALL times tables – multiplication and division facts. We will have a focus each week in class.

Optional activities for the half term.

Can you… use shape, colour and texture to create a bird of prey?	**Can you…research to find out about an underwater predator?**
Choose an artistic medium (clay/drawing/painting) to create a bird of prey e.g owl/kestrel. 	 Research an underwater predator of your choice on the internet and/or in books. Use these headings (and any others you choose) to organise your information. - **Habitat** - **Diet** - **Interesting facts** Present your information as a PowerPoint presentation, poster or information text.
Can you…create a comic strip? - The chase!	**Can you…write instructions about how to look after a predator?**
Draw and write a comic strip about a predator chasing its prey. Does it catch it in the end? Is it funny? Try to organise it into around 6 or 8 pictures with text, like the one below: 	Many of you will have pets at home that are predators. Write instructions for someone else to follow to help them look after a predator. Make sure you include the following features: title, a list of what you need, bullet points or numbers to separate each instruction, imperative verbs (that tell you what to do e.g. put, feed, clean). **Challenge:** Why not write under different headings such as 'feeding', 'cleaning', 'exercise', 'interesting facts' to make a factsheet?
